

RefrIGreater

Manage your fridge

HCI+D Team07

吳芳、黃漢威、林詩苓

Problem

People tend to forget what's in the fridge, causing food waste.

Solution

Let people memoize food in the fridge. Reduce food waste by expiration notification and by recommending recipes.

Tasks

- Simple: let people make their fridge's food list,
notificate before food expiration
- Moderate: recommend recipes for cleaning the fridge
- Complex: group fridge management
